FOUNDER'S WORD

Facing the complex challenges related to building protection, we founded SurfaSafe Consulting & Solutions to offer innovative, sustainable solutions tailored to each surface.

With over 26 years of experience, including 16 years at Expertal Tunisie specializing in the application of all types of paints and 10 years in multinational paint manufacturers, we have always dedicated our time and expertise to our profession and today we are happy to share them with all construction professionals.

We believe that prevention is protection. That's why we develop innovative tools, share our know-how, and engage directly on site to pass on the right techniques, the right choices, and the best practices.

Our success relies on attentive listening, rigorous analysis, and the constant desire to improve implementation conditions on site. It is with passion, rigor, and responsibility that we build our partner's trust every day.

Mehdi Daoud

OUR MISSION

We share on proven and highly sought-after expertise and know how in the building sector. Through our consulting, support, and targeted training, we offer innovative technical solutions to diagnose, treat, and effectively prevent building pathologies.

Our interventions, designed for construction professionals, aim to ensure healthier, safer, and more sustainable construction.

OUR VISION

To be the undisputed international leader in building treatment and protection. With cutting-edge field expertise, continuous innovation, and excellent pedagogy, we anticipate recurring building challenges to eliminate costly repairs. We are committed to promoting quality, durable, and responsible construction worldwide.

MISSIONS | VISION | VALUES

OUR VALUES

Technical rigor

Offer high-quality solutions through our expertise and commitment.

Sharing

Share our know-how to strengthen the skills of building professionals.

Innovation

Constantly seeking new approaches to improve building protection.

Ethics & responsibility

Acting ethically and responsibly for sustainable and environmentally respectful construction.

BUILDING PATHOLOGIES

From invisible pathologies to durable solutions

Behind every crack, every trace of humidity, or every surface degradation lies an often misunderstood imbalance with lasting consequences. Infiltration, condensation, rising damp, structural cracks, rendering detachment, mold, or efflorescence: all these disorders weaken the building, reduce its performance, and compromise occupants' health.

PROTECT YOUR ASSETS AGAINST **HUMIDITY**

Excessive presence of water or vapor in building walls

Causes: insulation, infiltration, rising damp, condensation.

Consequences: mold, corrosion, peeling of coatings, discomfort and unhealthiness.

BENEFIT FROM OUR SOLUTIONS A GAINST **DAMAGE**

Progressive or sudden deterioration of building elements.

Causes: aging, impacts, poor maintenance, pollution.

Consequences: cracks, subsidence, loss of structural performance, risk of collapse.

PROTECT YOUR ASSETS AGAINST **OXIDATION**

Chemical reaction between metal and oxygen, favored by humidity (rust).

Causes: prolonged contact with moisture, lack of protection.

Consequences: weakening of metal structures, loss of strength, danger to building stability.

KEEP YOUR PROPERTY SAFE FROM **BIO-DEGRADATION**

Decomposition of organic materials (wood, plaster...) by microorganisms such as fungi, molds, insects.

Causes: excessive humidity, poor ventilation, sensitive materials.

Consequences: material degradation, poor air quality, health risks.

SurfaSafe

OUR AREAS OF EXPERTISE

TECHNICAL BUILDING DIAGNOSIS

Understand before acting.

We carry out a precise diagnosis to identify pathologies, their causes, and their impact. This methodical analysis lays the foundation for targeted and lasting intervention.

At the end of the diagnosis, our technicians analyze the results and develop a comprehensive report about the origin of the problems and treatment proposals.

ADVICE & SUPPORT

Committed partner to your side.

From diagnosis to the completion of work, our experts support you at every step. Choice of solutions, sizing of work, suitable materials: everything is designed to ensure technical success and optimize your investments.

TRAINING AT SURFA SAFE ACADEMY

Because prevention go through transmission.

We offer practical training focused on concrete cases to develop professional skills and help adopt the right reflexes against building pathologies.

TRAINING MODULES

- Fundamentals of building surfaces.
- Diagnosis and identification of pathologies.
- Protection products and technologies.
- Applications and treatment processes with practical situations.

SurfaSafe

THOSE WHO TRUST US

CUSTOMIZED TECHNICAL SOLUTIONS

Every building is unique, so is our response.
 Based on the diagnosis, we design tailor-made solutions: moisture treatment, support reinforcement, surface protection...
 Our interventions are effective, adaptable, and suited to field constraints.
